Data Presentation and Visualization

- *Show Me the Data – Data Visualization and Presentation Webinar Series*: IDC's pair of recordings of the webinars introduces participants to the basics of creating clean, contemporary versions of charts and graphics, including basics and variations.

- *Part B Indicator Data Display Wizard*: This IDC tool can help states visualize selected data from their State Performance Plan/Annual Performance Report (SPP/APR). The tool uses Microsoft Excel to provide users with various chart options in order to display complex data by entering the data in a user-friendly, easy to follow format.

- *Interactive Public Reporting Engine*: IDC's interactive, dynamic data engine can help users determine where they are and how far they need to go to reach educational goals for children with disabilities. The *Interactive Public Reporting Engine* displays the complete set of data for school years 2013–14, 2014–15, and 2015–16 that states submitted to the Office of Special Education Programs to meet the requirements of Section 618 of IDEA.

- *Data Visualization Toolkit*: This toolkit from The Center for Early Childhood Data Systems (DaSy) provides tools and tips for effectively creating and presenting data visuals and is designed to support the data use subcomponent of DaSy's *Data System Framework*. Topics include animation, charts, color, data tables, dashboards, infographics, interactive displays, maps, presentations, and qualitative data.

- *Effectively Communicating Evaluation Findings*: This resource from the Center to Improve Project Performance (CIPP) helps users think about the data they may want to share, the needs and uses their target audiences have for the data, ways to communicate the data, and data needs of project staff.
