## Small Group Discussion Questions

What data are integrated in your state? What data are not integrated?

What challenges do you face working with data from sources that are not integrated currently?

How does your data processes documentation support your data quality efforts?

**If you could integrate your data with a snap of a finger, what data would you integrate first? Why?**

**What types of analysis might be possible with integrated data that are not possible now?**

**How could processes documentation support your integration efforts?**
