#### U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES U.S. DEPARTMENT OF EDUCATION

#### POLICY STATEMENT ON INCLUSION OF CHILDREN WITH DISABILITIES IN EARLY CHILDHOOD PROGRAMS September 14, 2015

#### **PURPOSE**

The purpose of this policy statement is to set a vision and provide recommendations to States, local educational agencies (LEAs), schools, and public and private early childhood programs, from the U.S. Departments of Education (ED) and Health and Human Services (HHS) (the Departments), for increasing the inclusion of infants, toddlers, and preschool children with disabilities in high-quality early childhood

It is the Departments' position that all young children with disabilities should have access to inclusive high-quality early childhood programs, where they are provided with individualized and appropriate support in meeting high expectations. This joint ED and HHS policy statement aims to advance this

- Setting an expectation for high-quality inclusion in early childhood programs;
- Increasing public understanding of the science that supports meaningful inclusion of children with disabilities, from the earliest ages, in early childhood programs;
- Highlighting the legal foundations supporting inclusion in high-quality early childhood programs;
- Providing recommendations to States, LEAs, schools, and early childhood programs for increasing inclusive early learning opportunities for all children; and
- Identifying free resources for States, programs, early childhood personnel<sup>®</sup>, and families to support high-quality individualized programming and inclusion of children with disabilities in

Though this policy statement focuses on including young children with disabilities in early childhood programs, it is our shared vision that all people be meaningfully included in all facets of society

### UNITED STATES DEPARTMENT OF EDUCATION OFFICE OF SPECIAL EDUCATION AND REHABILITATIVE SERVICES

January 9, 2017

We are writing to reaffirm the position of the U.S. Department of Education (ED or Department) that all young children with disabilities should have access to inclusive high-quality early childhood programs where they are provided with individualized and appropriate supports to enable them to meet high expectations. Over the last few years, States and communities have made progress in expanding early learning opportunities for young children, with all but four States investing in free public preschool programs. The Federal government, while aligning with the movement of States, has led several efforts to increase access to and the quality of early the inovement of duties, has red several entons to increase access to and the quality of early childhood programs, such as the Preschool Development Grants and expansion of Head Start. States have focused on improving the quality of early learning programs, including the development of early learning program standards and incorporating these into Quality Rating and Improvement Systems (QRIS).2

In September 2015, ED and the U.S. Department of Health and Human Services (HHS) issued a policy statement on promoting inclusion in early childhood programs to set a vision on this issue and provide recommendations to States, local educational agencies (LEAs), schools, and public and private early childhood programs. Despite the expansion of early childhood programs, there has not yet been a proportionate expansion of inclusive early learning opportunities for young children with disabilities. Given this concern and the ED-HHS policy statement on early childhood inclusion, the Office of Special Education Programs (OSEP) is updating the February 29, 2012, Dear Colleague Letter (DCL) to reaffirm our commitment to inclusive preschool education programs for children with disabilities and to reiterate that the least restrictive environment (LRE) requirements in section 612(a)(5) of the Individuals with Disabilities
