

INTERACTIVE INSTITUTE **2021**  
BUILDING AND SUSTAINING A CULTURE OF HIGH-QUALITY DATA

# Uncovering the Mysteries of Significant Disproportionality Through Data Visualization

April 13–15, 2021

IDEA DATA  
CENTER

Collect, Report, Analyze, and  
Use High-Quality Part B Data

# Presenters

Fred Edora, IDEA Data Center

Nancy O'Hara, IDEA Data Center

Linda Castellanos, Georgia Department of Education

Dawn Kemp, Georgia Department of Education

Matt Loesch, Ohio Department of Education

Kara Waldron, Ohio Department of Education

# Agenda

- Review of significant disproportionality requirements
- Visualizing significant disproportionality
- Let's hear from the states
  - Ohio
  - Georgia
- IDC resources
- Questions and wrap-up

# Review of Significant Disproportionality Requirements

IDEA DATA  
CENTER

Collect, Report, Analyze, and  
Use High-Quality Part B Data

# What Do States Have to Do?

- Collect and examine data for each LEA to determine if significant disproportionality based on race and ethnicity is occurring in the state and the LEAs of the state
- Use the risk ratio and alternate risk ratio
- Select a threshold for significant disproportionality
- Make decisions based on stakeholder input

# What Do States Have to Do? (cont.)

- Require the LEAs identified to reserve 15% of IDEA funds for comprehensive coordinated early intervening services (CCEIS)
- Ensure the review of policies, procedures, and practices

# What May States Do With Regard to Significant Disproportionality?

- May use up to three consecutive years of data
- May select a minimum cell size
- May select a minimum n size
- May apply a standard of reasonable progress

# Categories of Significant Disproportionality

- For each of seven racial/ethnic categories
  - The identification of children as children with disabilities, including the identification of children as children with specific disabilities
  - The placement in particular educational settings
  - The incidence, duration, and type of disciplinary removals from placement, including suspensions and expulsions
- This is a total of 14 categories times 7 racial/ethnic categories for a total of 98 calculations per LEA

# What Do States Not Have to Do With Regard to Significant Disproportionality?

- Publicly report the calculations or other information about significant disproportionality for all LEAs
- Note: The LEA Maintenance of Effort (MOE) Reduction and CEIS data collection is a 618 data collection and states must report the data publicly. This report contains information about which LEAs were identified with significant disproportionality and for what category and how much money they had to reserve

# What Do You Want to Report and to Whom?

This session will help you think about

- What you want to report
- To whom you want to report it
- The purpose for the report
- Some options for how you report it

# Zoom Poll

When you think about communicating data for significant disproportionality, who is your audience?

- a. Other state special education staff
- b. State staff outside of special education
- c. LEA administrators
- d. LEA special education administration and staff
- e. Families
- f. Advocates and other family support entities
- g. State Advisory Panel
- h. Teachers and other service providers
- i. General public
- j. Other

# Visualizing Significant Disproportionality Data

IDEA DATA  
CENTER

Collect, Report, Analyze, and  
Use High-Quality Part B Data

# The Elephant in the Room

# What Do You See?

**Risks (percents)**

**Risk Ratios**

# Why Do You Need to Communicate Significant Disproportionality Data Well?

- Calculations are often difficult to understand
- Decisions around these data may significantly affect educational funding for students with and without disabilities
- Data usually need a lot of context for the audience to understand
- Decision makers must use and analyze data to determine root causes
- Stakeholders can be passionate about ensuring equity and can have differing viewpoints on how to get there

# How Can Data Visualization Help?

- Many of us are visual learners
- Data visualization can make complicated data easier to consume and analyze
- A well-created data visualization can enhance understanding of the data and encourage meaningful discussion

# Questions to Consider

- Who are your main audiences when you show significant disproportionality data?
- Why do you need the data displays?
- How will you communicate these data?
- What additional information do you need to ensure your audience will understand the data display(s) you share with them?

# A Path to Clearer Data Displays

1. Make data quality a priority
2. Ensure you have a clear objective for creating the data display (what is the point?)
3. Select display options that best promote understanding
4. Recruit a “critical friend”
5. Allow any and all questions about your data displays

# Discussion in the Chat

What are your biggest challenges in communicating significant disproportionality data?

# Let's Hear From the States: Ohio

IDEA DATA  
CENTER

Collect, Report, Analyze, and  
Use High-Quality Part B Data

# Special Education Profiles

- Created annually for each district and community school
- Display performance over time on key indicators measuring services and outcomes for students with disabilities
- Notify the district of any required activities for compliance indicators and survey indicators

**Are young children with disabilities entering kindergarten ready to learn?**

- **Indicator 6**    Preschool Educational Environments
- **Indicator 7**    Preschool Outcomes
- **Indicator 12**   Early Childhood Transition from Part C to Part B

**Are children with disabilities achieving at high levels?**

- **Indicator 3**    Statewide Assessment
- **Indicator 4**    Suspension/Expulsion
- **Indicator 5**    School-age Educational Environments

**Are youth with disabilities prepared for life, work, and postsecondary education?**

- **Indicator 1**    Graduation
- **Indicator 2**    Dropout
- **Indicator 13**   Secondary Transition
- **Indicator 14**   Postsecondary Outcomes

**Does the district implement IDEA to improve services and results for children with disabilities?**

- **Indicator 8**    Facilitated Parent Involvement
- **Indicator 11**   Child Find
- **Indicator 15**   Timely Correction of Noncompliance Findings
- **Indicator 20**   Timely and Accurate Data

# New!

**Are children receiving equitable services and supports?**

- **Disproportionality: Identification**
- **Disproportionality: Placement**
- **Disproportionality: Discipline**

# Special Education Profiles: New Significant Disproportionality Section

## 2020-2021 OHIO SPECIAL EDUCATION PROFILE

BASED ON 2018-2019 & 2019-2020 DATA

### SAMPLE DISTRICT 2 (900000)

#### ESSENTIAL QUESTION 1 - ARE YOUNG CHILDREN WITH DISABILITIES ENTERING KINDERGARTEN READY TO LEARN?

Indicator 12: Early Childhood Transition from Part C to Part B

Target: 100.00%

Result: 100.00%

★ Met

FAQ, technical doc, and fiscal guidance

### Equity in Special Education: Addressing Significant Disproportionality

#### DID YOU KNOW?

#### WHAT IS SIGNIFICANT DISPROPORTIONALITY?

Disproportionality is one measure of educational inequity. It occurs when students of any racial subgroup are identified for special education, placed in more restrictive settings or disciplined at a markedly higher rate than their peers. The federal Individuals with Disabilities Education Act (IDEA) considers disproportionality to be significant when overrepresentation of a group exceeds a threshold defined by each state. **For the 2020-2021 school year, the Ohio Department of Education has set Ohio's threshold at a ratio of 2.50 in order to more fully identify and address racial disparities in special education across the state.**

According to federal [IDEA regulations](#), districts with significant disproportionality must:

- 1) Review their policies, procedures and practices for identifying, placing and disciplining students with disabilities;
- 2) Identify the factors that may be contributing to significant disproportionality; and
- 3) Provide services to address the contributing factors, including professional development for adults and educational and behavioral interventions for students, using 15 percent of their federal special education funds.

Federal regulations require states to calculate disproportionality using risk ratios in 14 categories for each of the seven racial groups identified by IDEA: American Indian, Asian, Black, Hispanic, Multiracial, Pacific Islander and White.

#### Categories for Analysis: Significant Disproportionality:

Identification (All students ages 3-21)	Placement (Students with disabilities ages 6-21)	Discipline (Students with disabilities ages 3-21)
1. All Disabilities 2. Intellectual Disabilities 3. Specific Learning Disabilities 4. Emotional Disturbance 5. Speech or Language Impairments 6. Other Health Impairments 7. Autism	8. Inside a regular class for less than 40 percent of the day 9. Inside separate schools and residential facilities	10. Out-of-school suspensions and expulsions of 10 days or fewer 11. Out-of-school suspensions and expulsions of more than 10 days 12. In-school suspensions of 10 days or fewer 13. In-school suspensions of more than 10 days 14. Total disciplinary removals

# Legend for Significant Disproportionality

**Legend:**

	Significant Disproportionality (Risk Ratio $\geq 3.0$ in same category, same racial/ethnic group for 3 consecutive years*: data reported in SR FY2018, FY2019, FY2020); <b>consequences imposed</b>
	Significant Disproportionality; (Risk Ratio $\geq 3.0$ in same category, same racial/ethnic group for 1 year or 2 consecutive years*; FY2020 or FY2019 and FY2020); <b>consequences not imposed</b>
	Risk Ratio $\geq 3.0$ for 3 consecutive years in same racial/ethnic group; data reported in SR FY2018, FY2019, FY2020)*; Cell size (OSS $\leq 10$ days count) $< 10$ or N-size (cumulative SWD enrollment in racial/ethnic group) $< 30$ ; <b>not considered for Significant Disproportionality</b>

**\*NOTE: FOR FY21 DETERMINATIONS 1 YEAR OF DURATION AND TYPE DATA WILL BE USED, FY19; ONLY FY20 & FY21 DATA WILL BE CALCULATED USING THE DISCRETE CALCULATIONS (OSS  $\leq 10$  DAYS)**

**Risk Ratio Formula:**

$$\frac{(\text{\# of SWD OSS } \leq 10 \text{ days in a specific racial/ethnic group in LEA})}{(\text{cumulative SWD enrollment in same racial/ethnic group in LEA})}$$
$$\frac{(\text{\# of SWD OSS } \leq 10 \text{ days in all other racial/ethnic groups in LEA})}{(\text{cumulative SWD enrollment in all other racial/ethnic groups in the LEA})}$$

Children 3-21 only

If the comparison group (all other races) cell size is  $< 10$  or the n-size is  $< 30$  the LEA is compared to the State (Alternate Risk Ratio).

**Alternate Risk Ratio Formula:**

$$\frac{(\text{\# of SWD OSS } \leq 10 \text{ days in a specific racial/ethnic group in LEA})}{(\text{cumulative SWD enrollment in same racial/ethnic groups in LEA})}$$
$$\frac{(\text{\# of SWD OSS } \leq 10 \text{ days in all other racial/ethnic groups in SEA})}{(\text{cumulative SWD enrollment in all other racial/ethnic groups in the SEA})}$$

Children 3-21 only
